"The Little Explorers"

We invest in the future

School Year 2024 -2025

ABOUT US

Dear Parents,

We would like to inform you about all the issues of everyday life and communication that will help with our cooperation.

Every year begins with new plans but with the same vision. To provide our students with all the Values, Knowledge, Skills that will make them Citizens of the world in a Safe Environment.

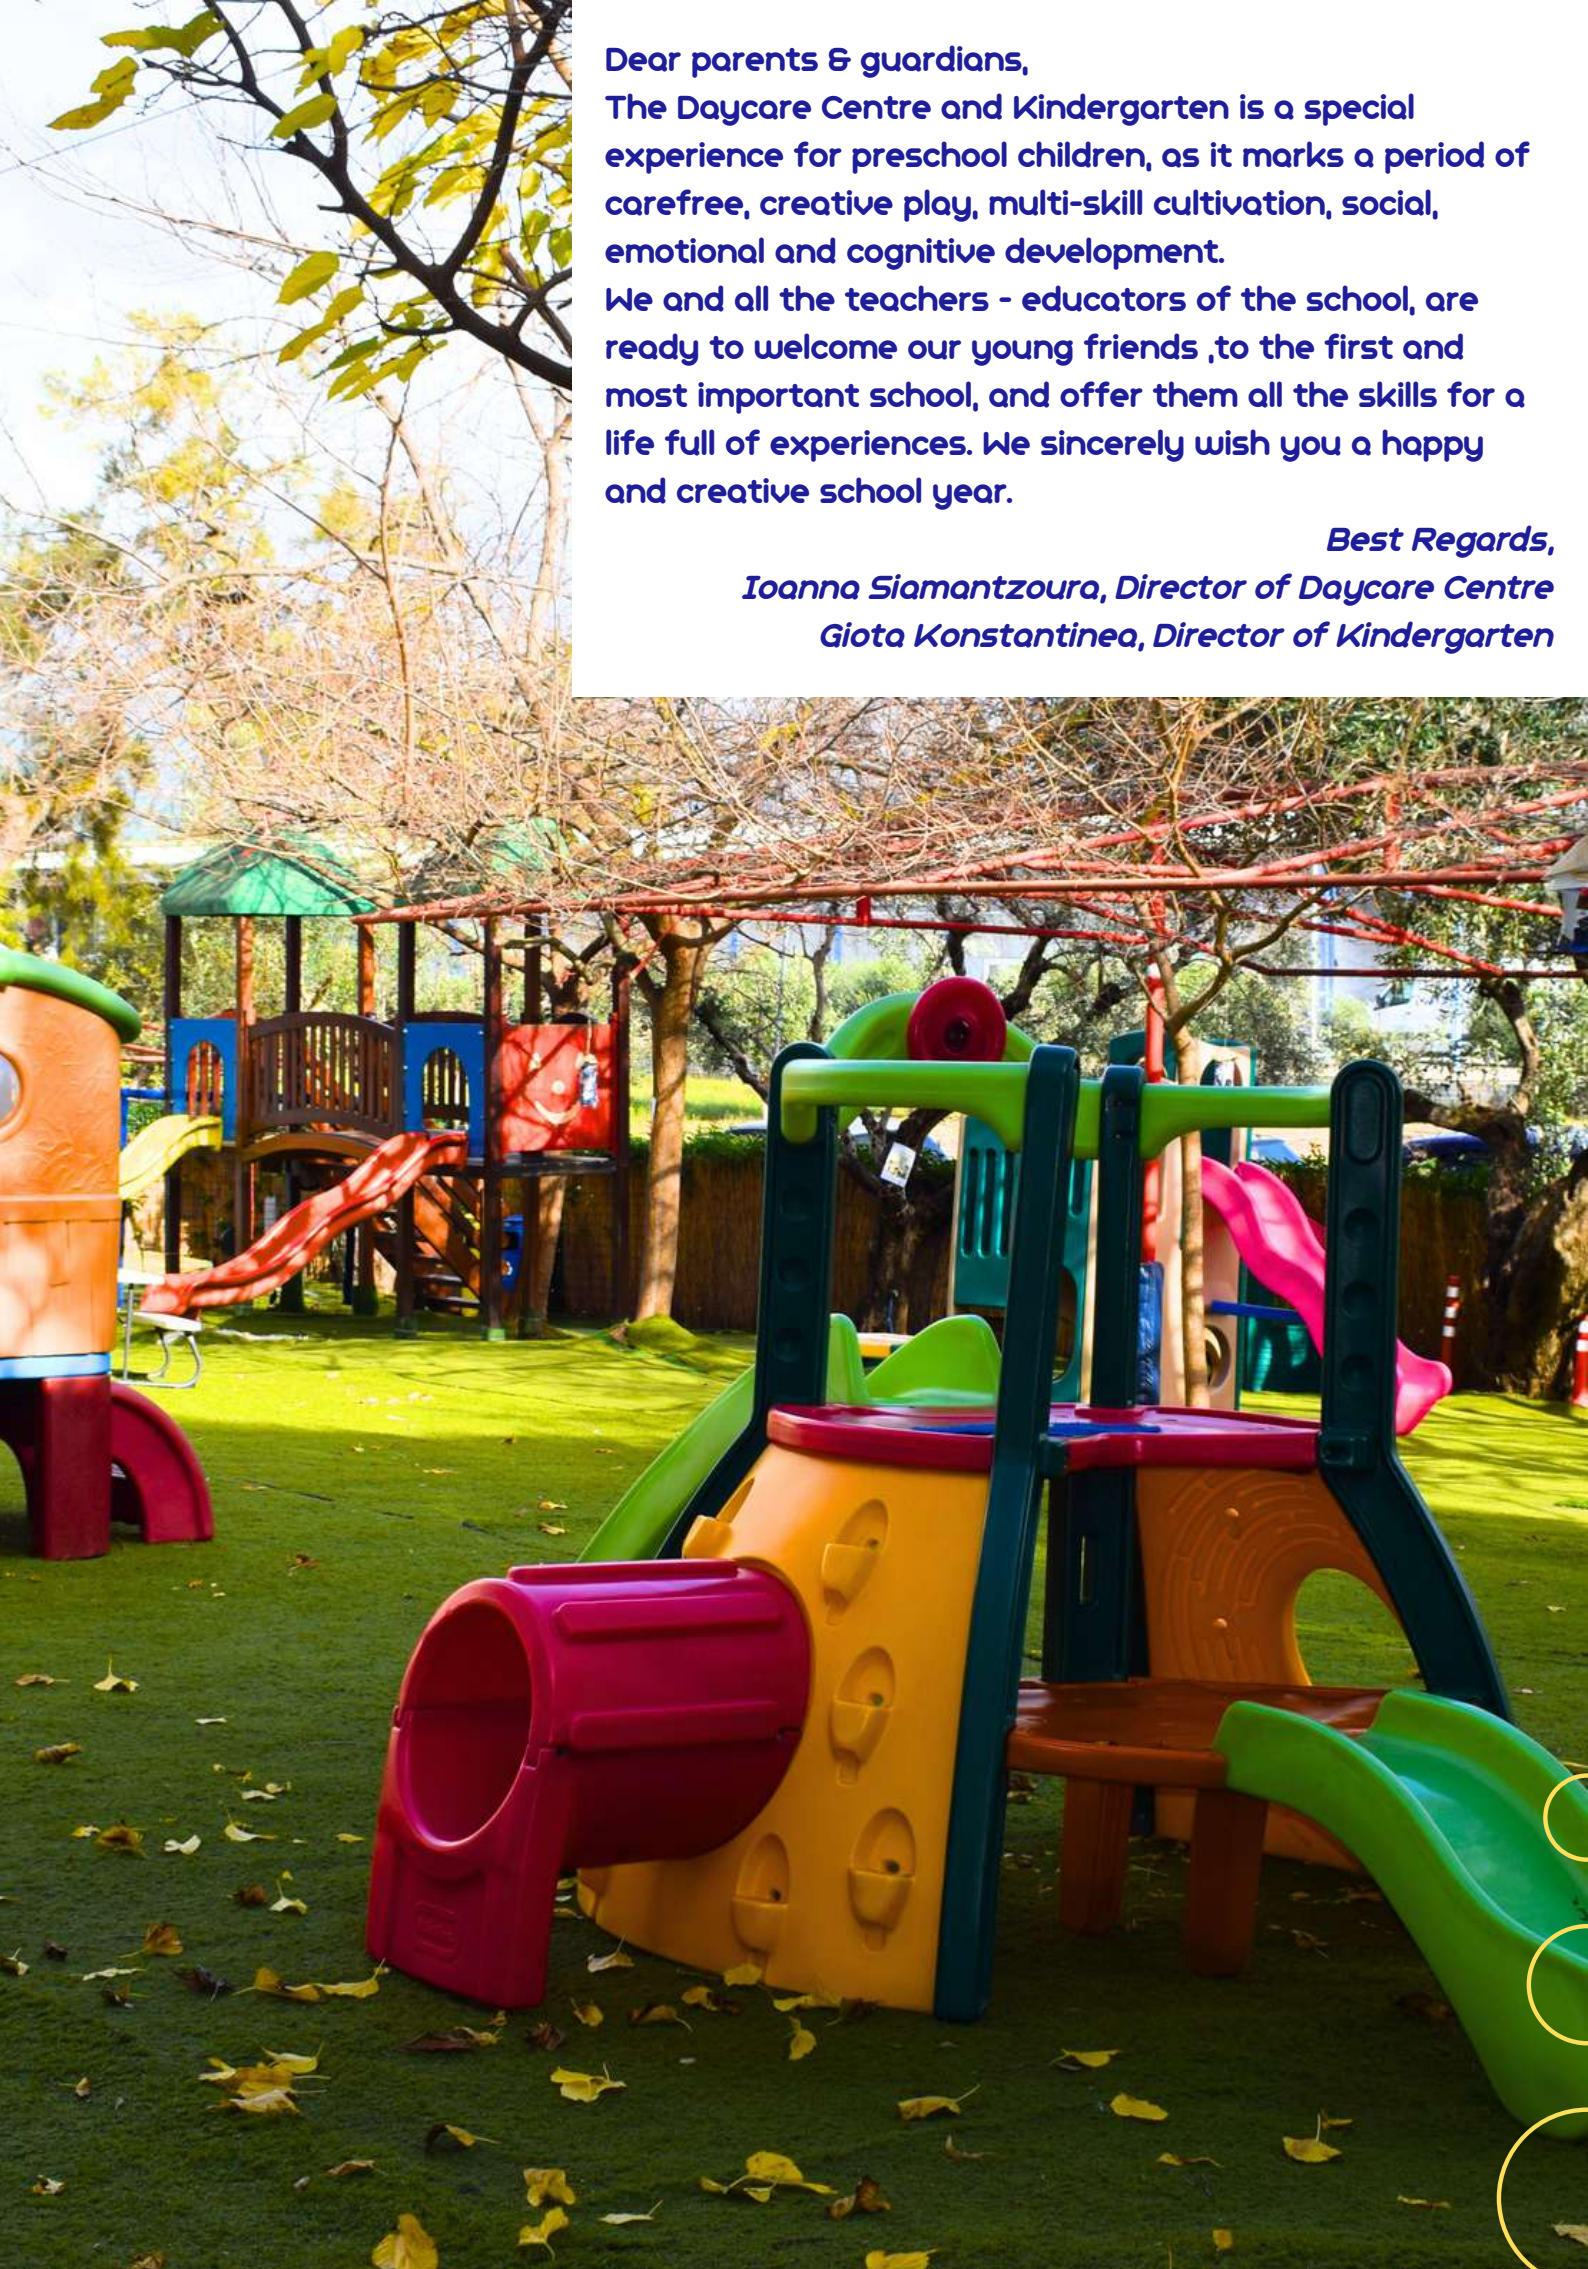

Moving on to the 4th decade of our educational path many changes have been made but we remain firmly committed to our goals. To innovate in Education, to delve into Education, to promote Culture.

At Ekpaideftiria Bouga every child has a unique opportunity to make our world a better place.

And this year we will try to honor your trust and offer our children the school they deserve. We are here for anything you need.

*Best Regards,
Fotis Bougas*

Dear parents & guardians,
The Daycare Centre and Kindergarten is a special experience for preschool children, as it marks a period of carefree, creative play, multi-skill cultivation, social, emotional and cognitive development. We and all the teachers - educators of the school, are ready to welcome our young friends ,to the first and most important school, and offer them all the skills for a life full of experiences. We sincerely wish you a happy and creative school year.

Best Regards,
Ioanna Siamantzoura, Director of Daycare Centre
Giota Konstantinea, Director of Kindergarten

OUR SCHOOL

- DAYCARE CENTER with sections: TODDLERS from 2.5 years old up to their enrollment in Kindergarten

Compulsory two-year schooling

- KINDERGARTEN with sections:
 - PRE-SCHOOL 4 - 5 years old

EDUCATIONAL PROGRAMS:

- Health Education
- Environmental Education
- Museum Education
- Tradition - Folklore
- Road Safety

- Emotional Intelligence - Social Skills
- Art (visual - music - theater)
- Natural Sciences
- Reading Club - Lending/Digital Library
- Skills workshops
- Information and communication Technologies

LEARNING WITH THE EXPERTS...

Specialties in the Basic Timetable

Our core program is enriched with additional teaching items for every great need of our young students.

PHYSICAL EDUCATION

Physical exercise is directly related to physical and mental health. In this way we invest from pre-school age in the Physical Education course providing student with the appropriate stimuli, to reinforce their physical and kinetic growth.

We Grow - We Move - We Exercise

MUSICAL KINETICS

Children become experimentally aware of the primary concepts of music combining rhythm (songs), motion (dance), improvisation and theatrical play.

We Play - We Express Ourselves - We Are Happy

Play, Learn
and have
Fun
together!

ENGLISH

We start learning English from the Daycare Centre, as we believe that this is the most appropriate age for introducing the child to a foreign language. Through play, singing, movement and with appropriate audiovisual means, children practice and are encouraged to learn basic vocabulary and to understand everyday language in English. With the help of a qualified English teacher children learn through play.

INNOVATIVE EDUCATIONAL PROGRAMS

MESSY PLAY AT THE DAYCARE CENTRE

Natural, free, undirected and intuitive play of children with materials that appeal to all senses. Game that soothes and creates experiences that act as food for the brain.

"If you want to do something nice for a child, give them an environment where they can touch things as much as they want."

Buckminster Fuller

EXPLORATORY LEARNING IN KINDERGARTEN - "THE LITTLE EXPLORERS"

Construction, learning research environments, authentic challenges.

Through new information and various stimuli children get to know their body, the environment in which they move and grow and perceive the world around them with all their senses.

TOGETHER WE ARE ONE

INNOVATIVE EDUCATIONAL PROGRAMS

CONSTRUCTION: LEGO AND LEGO MECHANISMS IN KINDERGARTEN

Lego constructions are fun learning experiences, arousing the natural curiosity of children to explore and learn together through play.

They develop their imagination, social skills, entertain, create and improve their delicate mobility.

With the Lego Mechanisms, children take the first steps in engineering and physics, understanding how simple real world machines that meet around them every day are working.

EDUCATIONAL ROBOTICS - PLANNING IN KINDERGARTEN

The educational robotics in Kindergarten combines learning with play and turns education into a fun activity.

It overturns old theories and is combined with new ones as:

- It gives problem solving opportunities (Bee Bot, the "smart bee")
- Allows free expression
- Promotes the interdisciplinary approach
- Supports collaboration and interaction
- Cultivates communication and verbal expression
- It reinforces tentative and critical thinking

ALL-DAY SCHOOL (OPTIONAL)

Our school offers an after school program where the activities allow children to cultivate their talents in various fields, to entertain and to practice in a familiar environment, spending time with their friends. The programs are held after the end of the organized time frame, by teachers and professionals.

The activities carried out are:

- Football (Preschool - Kindergarten)
- Basketball (Kindergarten)
- Baby Tennis (Daycare centre, Preschool and Kindergarten)
- English Language Program

Steps are put forward in preparing children for first grade. Kindergarten and Primary School teachers help children acquire a sense of security and confidence upon entering first grade.

SUMMER CAMP

After the end of the school year, summer courses of activities and recreation for children that have finished Preschool and Kindergarten (16th June - 31st July).

The program includes:

- Swimming (Optional)
- Art, pottery, painting, music
- Recreational visits / excursions
- Preparing the kindergartener for smoother integration into First Grade.
